

**ENVIRONMENTAL POLICY ACCORDING TO THE NORM ČSN EN ISO
14001:2016**

Our company strives to achieve the environmentally friendly impact of all our activities.

The management of the company 2JCP a.s. which is certified according to the norm ČSN EN ISO 9001 in the area of

Manufacture and assembly of welded steel structures and steel products

Repair and maintenance of machinery

Machining of steel products

Surface protection – Painting

Design and development

undertakes to the following:

- to fulfil valid provisions of all legal and other requirements which the company undertook to adhere to and which relate to it in connection with the implementation of the protection of the environment.
- to prevent accidents, which may lead to pollution of the environment, and to avoid excessive production of waste that may eventually have a negative impact on the environment
- to minimise negative impacts of all its activities and thereby to continually improve our environmental profile.
- to increase and deepen the knowledge of the protection of the environment among its employees and to engage even our business partners in our effort during the implementation of our projects. We wish to influence our suppliers so that they also act in an environmentally friendly way and we deliberately prefer companies, which implemented the environmental management system according to ČSN EN ISO 14001, and thereby we contribute to minimization of the possible impacts on the environment.
- to arrange qualified and professional approach of all employees to environmental protection, motivate them and to continuously internally and externally train them in the field of protection of the environment.
- to arrange the necessary resources to fund the activities in the field of protection of the environment and to direct them according to the seriousness of the risk.
- to arrange that the technical solutions of our products and services have the least impact on the environment with the aim to efficiently prevent potential negative impacts and the least possible burden to any part of the environment. We wish to minimise the potential negative impacts on the environment and to ensure safe disposal of all waste while putting the technology in operation.
- to check and assess the state of the environmental policy in the presence of the management of the company during the regular inspection. To define and accept new goals, target values and programs concerning environmental protection and to assess the overall effectiveness of the environmental policy, the state of the environmental goals and to continuously improve the efficiency of the system to ensure its constant suitability, appropriateness and efficiency.

All employees are obliged, and it is their responsibility to fulfil the demands of this policy and thereby participate in the continuous improvement of the environment.
